COVID-19 Vaccinated

Unvaccinated

Able to verify test:*

Isolate for **6 Days** and come back on **D7** to do an Antigen test at their institution. If negative resume duty, if positive return on **D8** after completing the **7 Days** isolation period

Unable to verify test:**

Isolate for a total of **7 Days**

Able to verify test:*

Isolate for **7 Days** and come back on **D8** to do an Antigen test at their institution. If negative resume duty, if positive return on **D11** after completing the **10 Days** isolation period

Unable to verify test:**

Isolate for a total of **10 Days**

HCWs that are returning must be Asymptomatic OR Improving in Symptoms for at least **24h** prior to resuming duty

***Able to verify test:** Able to test in a institute with an infection control unit.

****Unable to verify test:** Unable to test in a institute with an infection control unit.

Note: When there is a severe need for essential HCWs, they can return to work immediately or shorten isolation period to 5 days provided they have one negative Ag test and Asymptomatic or improved symptoms for at least 24hrs (as per [CDC recommendation](#)) [Refer to P.119](#)

CDC recommendation regarding HCWs Quarantine and Isolation

Work Restrictions for HCP With SARS-CoV-2 Infection and Exposures

“Up to Date” with all recommended COVID-19 vaccine doses is defined in [Stay Up to Date with Your Vaccines | CDC](#)

For more details, including recommendations for healthcare personnel who are immunocompromised, have severe to critical illness, or are within 90 days of prior infection, refer to [Interim Guidance for Managing Healthcare Personnel with SARS-CoV-2 Infection or Exposure to SARS-CoV-2](#) (conventional standards) and [Strategies to Mitigate Healthcare Personnel Staffing Shortages](#) (contingency and crisis standards).

Work Restrictions for HCP With SARS-CoV-2 Infection

Vaccination Status	Conventional	Contingency	Crisis
Up to Date and Not Up to Date	10 days OR 7 days with negative test [†] , if asymptomatic or mild to moderate illness (with improving symptoms)	5 days with/without negative test, if asymptomatic or mild to moderate illness (with improving symptoms)	No work restriction, with prioritization considerations (e.g., types of patients they care for)

Work Restrictions for Asymptomatic HCP with SARS-CoV-2 Exposures

Vaccination Status	Conventional	Contingency	Crisis
Up to Date	No work restrictions, with negative test on days 1 [‡] and 5–7	No work restriction	No work restriction
Not Up to Date	10 days OR 7 days with negative test [†]	No work restriction with negative tests on days 1 [‡] , 2, 3, & 5–7 (if shortage of tests prioritize Day 1 to 2 and 5-7)	No work restrictions (test if possible)

[†]Negative test result within 48 hours before returning to work

[‡]For calculating day of test: 1) for those with infection consider day of symptom onset (or first positive test if asymptomatic) as day 0; 2) for those with exposure consider day of exposure as day 0
