## PERFORMING SURGICAL PROCEDURES

Performing surgical procedures is the request of a physician/dentist to be permitted to perform surgical procedures in a facility other than the primary facility.

All performance of surgical procedures applications must be made through the online system **MEHAN**

The following documents are required for the transfer of a license:

1. No Objection letter from the primary facility
2. Electronic invitation from the facility where the surgical procedures will be performed through (MUNSHAAT) provided that the facility has the specialty within its scope of services

The healthcare facility the applicant intends to perform surgeries at must have the specialty/profession within the scope of its services as mentioned in its license issued by NHRA.

If the application is approved, the approval will be issued in the applicant's account in **MEHAN**

The validity of the permit will match the specified dates in the application or the expiry date of the applicant's license if no dates are specified.

If the facility does not have the specialty/profession within its scope of service, the application will be rejected.
